[SUMMARY]

Cybersecurity analyst specializing in Wazuh SIEM deployment, Sysmon telemetry engineering, and adversarial detection. Founder of NexaShield Group LLC, providing NYC-based cyber defense, threat hunting, and incident response services. Experienced in building SOC labs, engineering detection rules, and securing Windows environments. Strong focus on endpoint telemetry, SIEM architecture, and active threat hunting.

[CORE SKILLS]

- Threat Hunting & SOC Monitoring
- Sysmon Telemetry Engineering
- Windows Security Hardening
- Detection Engineering
- SOC Operations
- Wazuh SIEM Deployment
- Incident Response & Log Analysis
- Adversarial Attack Simulation
- PowerShell Investigation

[PROJECTS & LABS]

// SOC Lab — Wazuh SIEM Detection of Brute-Force Attempts

- Built SIEM + Sysmon lab detecting failed logins, account lockouts, executable drops.
- Tuned Wazuh rules (60204, 60115, 92217).
- Built dashboards for threat hunting.

// Sysmon Telemetry Engineering

- Designed custom Sysmon rules for process creation, network connections, registry modifications, file events.

// Adversarial Simulation Lab

- Simulated brute-force attempts using Hydra to test detection coverage.

[EXPERIENCE]

Founder — NexaShield Group LLC (NYC Cyber Defense & Consulting)

December 2025 – Present

- Provide SIEM deployment, Sysmon engineering, threat hunting.
- Build SOC labs and detection rules.
- Perform security assessments.
- Deploy Wazuh agents and configure dashboards.
- Conduct incident response investigations.

Cybersecurity Student — LaGuardia Community College

March 2026 – Present

- Coursework in SOC operations, Windows security, network defense.
- Hands-on labs in SIEM, Sysmon, threat hunting.

[EDUCATION]

LaGuardia Community College — Cybersecurity Major (March 2026 – Present)

Queensborough Community College — Full-Stack Software Engineering Micro-Credential (August 6, 2024)

[CERTIFICATIONS]

CompTIA Security+ (In Progress)

[TOOLS]
